- **Introduce Boolean Logic, Conditionals and Loops**
  - Understanding of logical operators
    - `!=` , `==` , `&&` , `||`
  - Grasp of the syntax for different loop types
    - `for-loops` , `do-while` , `while loops`
  - Grasp of conditional expressions
    - If-else statements vs Only If.
    - Switch statements.
    - <mark>Control flow</mark>
